## NOTMAN PASTURE SEEDS

Our range of Equine Pasture Blends are proven performers developed to provide all classes of horses with high quality, safe grass pastures and increase paddock production.

At Notman Pasture Seeds careful consideration is given to each seed selection, ensuring these horse grass pasture blends feature varieties of grass seeds that match the grazing habits of horses, provide nutrients naturally, are palatable and have the ability to handle grazing pressure.

### PREMIUM EQUINE BLEND

A highly productive multi species pasture blend that produces a uniform supply of palatable grazing for horses throughout the growing season.

Ideal for horse owners wanting to increase paddock quality and production, with surplus pasture production in spring can make excellent quality silage and hay. The inclusion of lucerne and white clover can increase the quality of the pasture. Can tolerant a range of soil types.

- **Perennial Ryegrass Meadow Fescue**
- **Cocksfoot**
- **Prairie Grass**
- **Brome Grass**
- **GT5 Lucerne**
- **Kentucky Bluegrass**
- **White Clover**

### SOUTHERN ALL PURPOSE BLEND

Balanced pasture blend containing ryegrass, cocksfoot and fescue to perform in a wide range of soil types.

Designed for southern higher rainfall areas in Victoria & Tasmania, this high quality blend can produce dense high winter and spring pasture growth with the inclusion of perennial ryegrass and prairie grass.

The tall fescue and cocksfoot can provide good production into summer when moisture is available. All grasses contain no harmful endophytes for horses.

- **Perennial Ryegrass Meadow Fescue**
- **Tall Fescue Nil Endophyte**
- **Subterranean Clover**
- **Prairie Grass**
- **Cocksfoot**

## LONG TERM HARDY DRYLAND BLEND

Long term hardy horse pasture blend that contains species that can tolerate drier conditions and hard grazing including prairie grass, cocksfoot, brome grass and browntop. Slower out of the ground than other equine pasture blends, but is very persistent once established

- **Prairie Grass**
- **Cocksfoot**
- **Brome Grass**
- **Browntop**

## FESCUE EQUINE BLEND

A hard wearing perennial multi species blend that produces a uniform supply of grazing throughout the growing season. Improved leaf softness in the tall fescue over other traditional cultivars increases palatability, and a reduced aftermath heading increases quality.

- **Tall Fescue Nil Endophyte**
- **White Clover**
- **Red Clover**
- **Strawberry Clover**

---

## TURF EQUINE BLEND

A fast establishing grass pasture for horses that is animal safe with low endophyte levels to reduce grazing risks and good recovery from wear.

With vigorous grasses that establish quickly, this blend can be ideal for heavy traffic areas.

- **Perennial Ryegrass Meadow Fescue**
- **Kentucky Bluegrass**

---

## SHORT TERM EQUINE BLEND

A fast establishing blend of Italian ryegrasses that produces very high yields, particularly in the autumn, winter and spring. It is an ideal pasture-break blend for horses, assisting in the renovation program by cleaning up a paddock before sowing a permanent perennial pasture.

- **Italian Ryegrass**
